Visit [www.surefootcorp.com](http://www.surefootcorp.com) for additional installation instructions

Made in USA

**BOLD STEP® Anchor Systems can be used for poured & precast concrete, steel-pan cement filled stairs and terrazzo stairs.**

BOLD STEP® is an aluminum extrusion inlayed with our proprietary mineral abrasive anti-slip epoxy-filler offered in a variety of colors and sizes. Either used in new construction or renovation projects, our nosings and treads deliver maximum safety and durability while providing a look to compliment today's building designs.

### » Quality and Durability

Our stair tread nosing anchors can be used on new construction as well as existing buildings. The nosings are equally durable and effective on surfaces including poured and precast concrete, steel-pan cement filled stairs and terrazzo stairs. We use high-quality materials in our anchors, which consist of heavy-duty, heat-treated aluminum extrusion with proprietary mineral abrasive anti-slip epoxy-filler laid into the metal. Our products are built to last as long as the building does. This inlay is created from a mixture of colorfast epoxy-filled abrasive mineral grits. These treads are both chemical resistant and will resist damage from UV rays. The non-porous surface allows for easy cleaning.
